Wong, W.S., 25
Wood, B.N., 137
Yang, S.S., 47

TITLE INDEX

Accounting versus economic valuation in a simple inventory model, 229
Application of Markov chains to life-cycle cost analysis, an, 151
Bottleneck generalized assigment problems, 61
Comparing two techniques for fitting sample data to a cumulative average learing curve, 145
Cost and price indices, 247
Costs of production in the Shenzhen special economic zone in China, 199
Design analysis through techniques of parametric cost estimation, 87
Design of a model generator for simulation in SLAM, 189
Dynamic lot sizing and facility location, 267
Economic operation of a power system, 275
Efficient formulation of the single machine, static demand, lot scheduling problem, a more, 3
Estimating capital costs from an equipment list: A case study, 259
Including variability of discrete estimates in engineering economic comparisons, 211
Integration of network analysis systems with MRP in a make-to-order manufacturing environment, 47
Life cost studies: A defence management perspective, whole, 107
Local search approach to flexible flow line scheduling, the, 25
MATHES: An expert system for material handling equipment selection, 297
Missile propulsion cost modeling, 117
Mixed-integer programming model for the design and planning of power systems in oil production platforms, a, 281
Multicriteria scheduling of dynamic production activities, 19
Numerical evaluation of heuristics for the multi-item single-level capacitated lot-size problem, 233
Optimizing the location of input/output stations within facilities layout, 177
Parametric estimating for new business ventures, 165
Parametric modelling as a scheduling tool, 137
Parametrics: The role of subjectivity in cost models, beyond, 131
Production scheduling on parallel machines subject to staircase demands, 11
Production with optimum irrigation management under saline conditions, 41
Scheduling in large scale production systems: A medium term production management model, 67
Simulating the design and analysis of quality control systems in manufacturing, 217
Software parametric cost estimation: Wave of the future, 157
Techniques for cost estimating in early program phases, 95
Tool for constructing production systems on the deductive database system Adbis, a, 77
